

Jiangsu Eastern Shenghong: 2025 Q3 Results and Provision for Asset Impairment

Suzhou City, China, September 30, 2025

Jiangsu Eastern Shenghong Co., Ltd. (the "**Company**") today reported financial results of the third quarter of 2025.

- During the third quarter of 2025, the Company achieved operating revenue of RMB 31,245,172,779.20, a decrease of 11.91% over the same period last year. Net profit attributable to shareholders of the listed company of RMB -259,833,007.19, a increase of 85.05% over the same period last year. Net cash flows from operating activities accounts to RMB -343,160,407.86, a increase of 77.06% over the same period last year. The changes in revenue were mainly due to fluctuations in crude oil prices, some price of the Company products declined, resulting in a decline in the Company's revenue.
- The provision for impairment of assets of the first three quarters of 2025 decreased the total profit of the consolidated financial statement in the first three quarters of 2025 by RMB 329.2105 million. The Company conducted a comprehensive examination and impairment testing of various assets as of September 30, 2025. Based on the testing results, the Company made provisions for impairment for assets where impairment indicators were identified.

About Jiangsu Eastern Shenghong Co., Ltd.

Led by a visionary management team, the Company has established leading positions in business segments including renewable energy materials, performance chemicals, petrochemicals, and chemical fiber industries. Underpinned by its leading position and high brand awareness, the products are widely adopted in downstream applications. In particular, Shenghong is a pioneer in the renewable energy materials and performance chemicals sector, and it intends to continually invest in this sector to capture its strong growth potential.

At present, the Company has the 16 million tons/year refining and chemical integration unit, 2.4 million tons/year MTO unit and 0.7 million tons/year PDH unit, realizing the full coverage of three olefin production process routes, namely, "oil head", "coal head" and "gas head". Through the differentiated and diversified layout of raw material sources of "oil, coal and gas", the Company has more options and possibilities in terms of comprehensive cost control, coping with the risk of cyclical fluctuations, new product research and development, and process route selection of downstream high-end petrochemical products, building a solid foundation for the Company to further play the advantages of scale operation, reduce the operational risk caused by cyclical fluctuations of the industry, and better realize anti-cycle and cross - cycle steady development.
